Summary

Combines user-centered design with technical feasibility to enhance company results. I balance the ideal user experience with business constraints to ensure the best outcomes are achieved.

Skills

UX Research & Strategy: User Interviews • Surveys • Journey Mapping • Jobs to be Done • Usability Testing • A/B Testing • Heuristic Evaluation.
UI Design & Prototyping: Wireframing • High-Fidelity Mockups • Design Systems • WCAG Accessibility • Information Architecture • Progressive Disclosure
Technical Skills: HTML • CSS • JavaScript • React • API Integration • Wordpress
Collaboration & Process: Agile/Scrum • User-Centered Design • Design Thinking • Cross-functional Collaboration • Stakeholder Management

Work Experience

UX/UI Designer | Pipoca Agil

09/2024 - Present

- Led comprehensive UX research for Ciclo Agil period tracker app, conducting surveys with over 50 participants to identify key user pain points and design opportunities.
- Designed end-to-end mobile experience from initial sketches to high-fidelity prototypes in under 3 months, achieving task completion success rate during usability testing.
- Established an efficient design-to-development workflow by delivering detailed UI specifications and maintaining weekly engineering meetings, reducing implementation iterations by 30%.
- Built a scalable UI component library using **atomic design principles** and components, creating 20+ reusable UI components that accelerated future development cycles.
- Optimized user onboarding experience through **rapid prototyping**, implementing progressive disclosure techniques to improve user adoption.

UX/UI Designer | Freelance

06/2025 - Present

- **Led the end-to-end redesign** of a real estate platform and **collaborated on front-end development** (HTML/CSS/JS), ensuring a pixel-perfect implementation of high-impact UI components.
- **Architected a high-performance filtering system** and integrated micro-location data (Maps API), resulting in a **45% increase in average session duration** by reducing the need for external searches.
- **Refined the conversion funnel** by implementing a context-aware WhatsApp bridge, which led to an **increase in leads** arriving pre-qualified with property metadata, streamlining the brokerage process.

Projects

Design System

- **Developed a scalable Design System from the ground up**, including **semantic tokens**, responsive grid, accessibility foundations (WCAG), and a modular component library aligned with Tailwind and Astro.
- **Improved design-dev collaboration** by introducing a unified token architecture and documentation standards, reducing UI inconsistencies and accelerating implementation.
- **Delivered a system-ready interface foundation** that supports platform growth, ensures **visual consistency**, and enables faster iteration for future product features.

Ultrahuman UX/UI Case Study

- Improved the clarity and usefulness of health data by reframing insights in a more relatable, human-centered context, reinforcing the importance of storytelling in data-driven experiences.
- Conducted end-to-end **journey mapping** and formulated hypothesis statements based on research.
- Defining success: Increased engagement, customer retention, and reduced data interpretation time for users.

Education

Design Circuit Academy Product Design Program	2024
Flatiron School Full Stack Web Development	2022
Centro Universitário Metodista IPA BS Nursing	

Certifications

- Google UX Design Professional • DesignCraft • Introduction to Information Design and Data Visualization
